The Native American
Legend Says...

If you want a special
wish to come true,
capture a butterfly
and whisper your
heart's desire to it...

Memorialize your special event with a
Butterfly Release!!

Adding butterflies to your guest list is a unique way to bring magic to any event. Giving the gift of flight is an experience that will remain in the hearts and minds of guests forever. Whether released by each guest or the guest of honor, these enchanting creatures will captivate all and turn your event into a spectacular one! Everyone loves butterflies!

Monarchs are everyone's favorite butterfly as well as one of the friendliest. Their average wingspan is about 4 1/2 inches and display a striking contrast of black, white, and orange colors. This makes for a most dramatic effect during release. These friendly creatures love to nectar on nearby blooms and frolic with fellow guests allowing everyone to interact.

Our beautiful Monarchs are hand-raised with lots of tender loving care. They can be hand delivered locally or shipped via overnight delivery elsewhere to arrive the day before your event and require minimal care until ready for release. The precious cargo is hand fed and exercised before being carefully placed in individual envelopes and packaged in an insulated box. The box contains a cold pack which lowers their body temperature to keep them in a dormant, sleep-like state until ready for release. Envelopes can be personalized with names and dates. Decorative, netted display cages are also available.
